PROFESSIONAL SUMMARY

Master's student in Computer Science (AI & Data Science) at CESI École d'Ingénieurs with 4+ years of professional experience across data analytics, software development and IT support. Built and compared several churn prediction models, led a Power BI dashboard suite that cut reporting time by 30%, automated pipelines that saved 40+ hours a month, and built a full-stack AI assistant using RAG and vector search. Looking for an internship in data, analytics or AI.

SKILLS

Machine Learning & AI: Random Forest, Logistic Regression, scikit-learn, SHAP, SMOTE, Feature Engineering, Model Evaluation, RAG, Semantic Embeddings, Vector Search, NLP, Prompt Engineering, Cybersecurity (upcoming coursework)

Analytics & BI: Power BI, DAX, Tableau, GA4, BigQuery, KPI Design, Data Visualization, A/B Testing, Hypothesis Testing, Exploratory Data Analysis

Programming: Python, SQL, pandas, NumPy, TypeScript, React, Next.js, Node.js, C/C++, R (basic), Git, Linux

Data Engineering & Tools: ETL/ELT, Data Pipelines, Data Quality, dbt, Hadoop, Hive, Docker, AWS, PostgreSQL, Supabase, Microsoft Excel, Word and PowerPoint, Power Apps, Power Automate

WORK EXPERIENCE

Data Analyst | Sanlam Allianz Kenya - Innovation & Growth | Nov 2024 – Sep 2025

- Integrated GA4 and GTM (25+ custom events) with automated BigQuery exports to track the customer funnel, contributing to an 18% increase in recovered marketing leads.
- Led a Power BI dashboard suite that cut reporting time by 30%; automated daily ETL pipelines, saving 40+ hours of manual work per month.
- Used Power BI to flag users who were trying to exploit the system (suspected fraud), working from the metrics provided.
- Worked with Actuarial, IT and CX teams to turn analysis into recommendations and workflows the business could use.

Junior Data Scientist | GW Dynamics | Jan 2023 – Aug 2024

- Designed predictive models and BI dashboards (Power BI, Tableau) improving client operational efficiency by 30%.
- Optimized data ingestion pipelines across APIs, databases and flat files, cutting reporting latency by 45%; applied statistical analysis and hypothesis testing.

IT Support Intern | Sanlam Allianz Kenya - IT Department

- Resolved hardware, software, network and account issues for internal and external users, on-site and remotely.
- Managed support tickets, device setup and user accounts; troubleshot LAN, Wi-Fi and VPN issues; handled routine patching and backups.
- Trained staff and tracked recurring issues in Excel to reduce repeat requests.

Freelance Full-Stack Developer | Strathmore University

- Developed 3 custom web-based management systems for sports, clubs and international student administration, from interface to database.
- Built booking management, user registration and data management features.
- Tools: Next.js, React, TypeScript, Node.js, PostgreSQL / Supabase

PROJECTS

Customer Churn Prediction | Python, scikit-learn, SHAP, SMOTE, Jupyter

- Built and compared several supervised churn models on 30K insurance records under the same conditions, selecting the best by F1; removed data leakage and used SHAP to show age, tenure and satisfaction as the main drivers.

Big Data Pipeline | Hadoop, Hive, dbt, Docker, Power BI, PostgreSQL

- End-to-end ETL pipeline ingesting multi-source data (CSV, PostgreSQL, Excel, TXT) into a Hive warehouse, connected to Power BI for dashboards and heatmaps.

Lumen - AI Coding Assistant | Next.js 16, TypeScript, RAG, Vector Search, Supabase

- Full-stack AI assistant using semantic embeddings and vector search, with real-time streaming, persistent chat and token limiting.

EDUCATION

Master's in Computer Science - AI & Data Science | CESI École d'Ingénieurs, Lyon, France | Sep 2025 – 2027
Coursework: Natural Language Processing (current), Cybersecurity (upcoming)

Bachelor of Business and Information Technology | Strathmore University, Nairobi, Kenya | Apr 2020 – Dec 2023
Major in Networking · Thesis: Parking Space Prediction Using Machine Learning

LANGUAGES

English: Native / Bilingual | **French:** Intermediate | **Japanese:** Basic
